Production Equipment

All line of productions are using auto feeding system and metering system Computer numeral control technology It makes exact ceighting precision on the dispensing. (FIY: Liquid dispensing $\pm 0.005\text{kg}$)The line start From two-roll pilger mill to 5 roll calender. All line of productions are computer auto controlled to effectively ensure the advanced technology of products and long-term stability of quality.

Finally finishing the roll by full auto winding machine . Max width 1300mm We have 7 PVC production equipment ,so we will produce virgin ,color ,recycle on different equipment ,to make sure the stable quality ,other factory only have 1-2 production equipment ,so they have to produce all of quality in one machine ,so hard to control the quality .

Dear Customers,

Except the PVC film and sheet, we can also supply the
PET/PP/PS/PETG/PC film, you can choose any of them to mixed packed
into one container, welcome your contact.

Sincerely yours,

Shelly Shao
